

Multi-Purpose EP2 Grease

STARFIRE Multi-Purpose EP2 Grease is recommended for moderate speed and temperature applications. It is suitable for bearing temperatures up to 121°C (250°F) and down to -12.2°C (10°F). STARFIRE Multi-Purpose EP2 grease provides excellent lubrication performance for automotive chassis, electric motor bearings, universal joints, fifth wheels and general purpose bearing lubrication.

Features:

- Water Resistant
- Corrosion Protection
- Oxidation Stability
- Economical

Specifications:

- Soap Type: Lithium
- NLGI Grade: 2
- Color: Dark
- Texture: Smooth, Buttery

TYPICAL PROPERTIES	
NLGI Grade	2
Dropping Point °F, Min.	365
Worked Penetration @ 77°F, 60 Strokes	295
Base Oil Viscosity @ 40°C, cSt	140
Color	Amber
