

TC-W3 PREMIUM 2-CYCLE OIL

Starfire TC-W3® Premium 2-Cycle Oil is a premium, high quality motor oil formulated for use in outboard motors, motorcycles, snowmobiles, chain saws, garden equipment and other fuel lubricated or fuel injected 2-Cycle engines. It is formulated to prevent ring sticking, reduce spark plug fouling and keeps engine clean.

Starfire TC-W3® Premium 2-Cycle Oil is recommended for use in O.M.C., Mercury, Suzuki, Yamaha and other manufacturers of water/liquid cooled two-cycle engines. It is recommended for use in all snowmobiles, motorcycles, lawn mowers, chain saws, golf carts, ATV's, scooters, mopeds and small HP engines calling for an API TC category two-cycle motor oil and/or a category FIM 4 motor oil.

Follow engine manufactures' recommendations to determining correct oil/fuel ratio. Add oil to fuel, mix thoroughly.

Benefits

- Multi-application usage
- Ideal for oil injected and fuel/oil lubricated engines
- Meets API TC and JASCO FB, TC-W3® specifications
- Licensed by National Marin Manufacturers Association (NMMA).
- Improved lubricity which meets the requirements of all two-cycle engines
- Additive chemistry provides "very good" "air cooled" performance, particularly suitable in snowmobiles
- Improved cleanliness
- Prevention of carbon deposits
- Excellent high temperature performance
- Recommended where an ashless high performance oil is required
- Complete, easy mixing in gasoline at cold temperatures
- Prevention of piston rings sticking
- Prevention of piston skirt scoring
- Provides the ultimate in protection and performance for two-cycle engine

TYPICAL PROPERTIES	
Gravity, °API	32.2
Specific Gravity @ 60°F (15.6°C)	0.8644
Viscosity @ 40°C, cSt	30.07
Viscosity @ 100°C, cSt	6.15
Viscosity Index	159
Pour Point °F	-53
TBN, mgKOH/g	10
